PROJECT TITLE-

HEALTHMAX HOSPITAL WEB SITE

Home page-

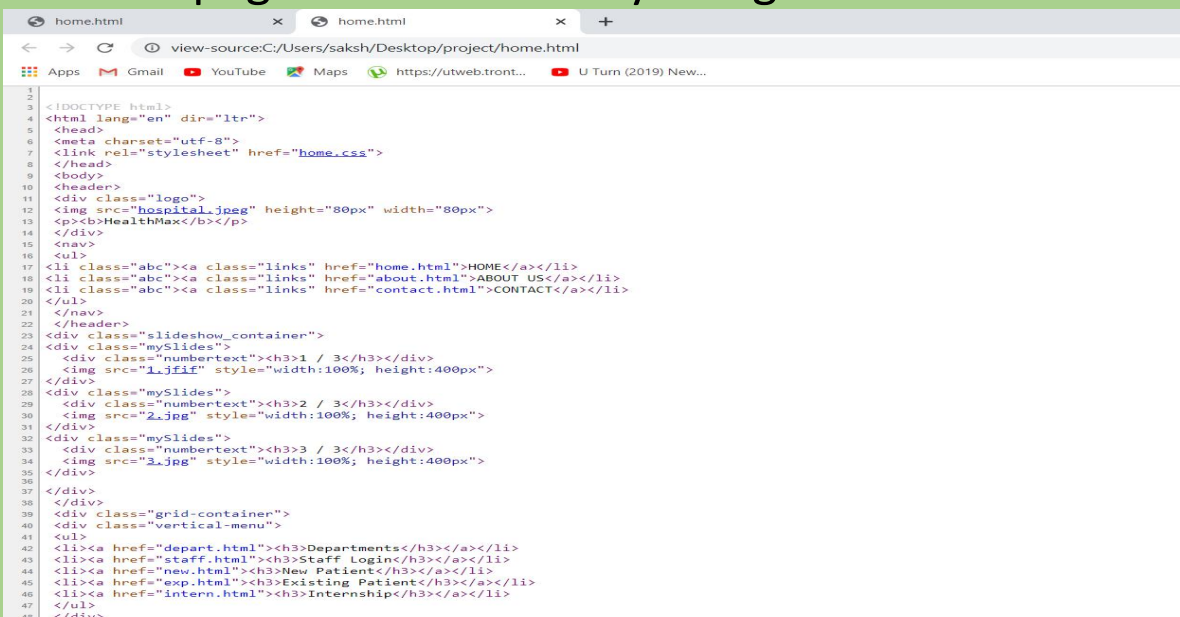

The home page is created by using the modules of html,CSS,JavaScript.Various container classes are made to divide the web page as required.

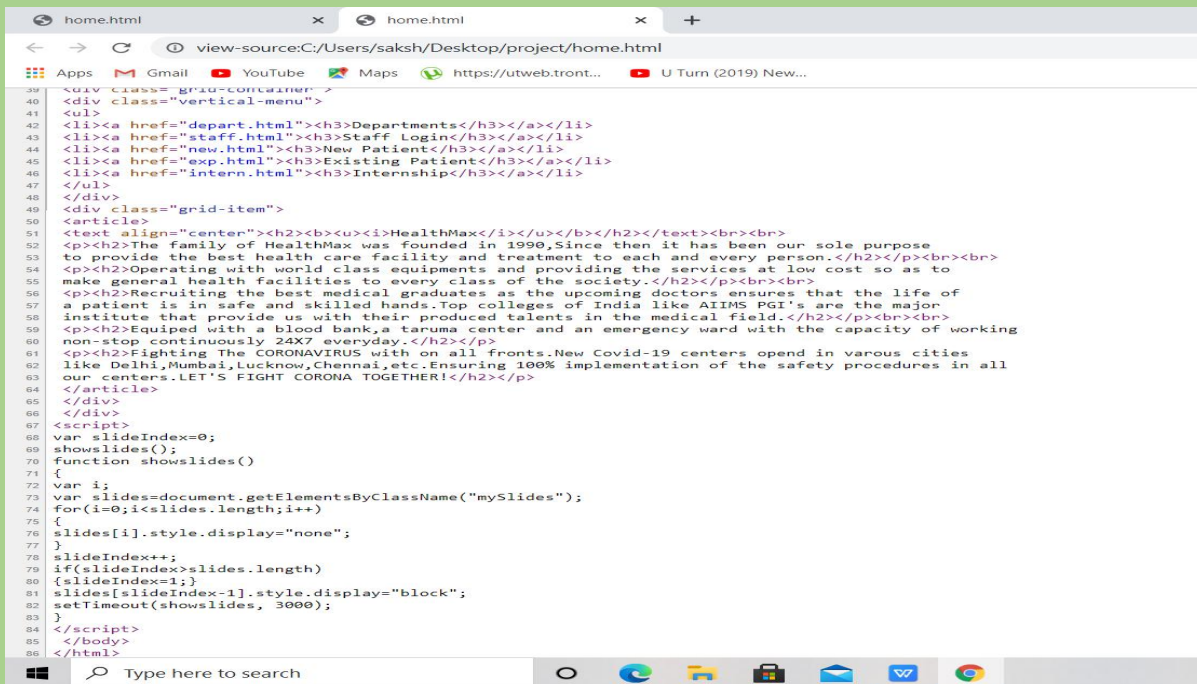

Modules used-

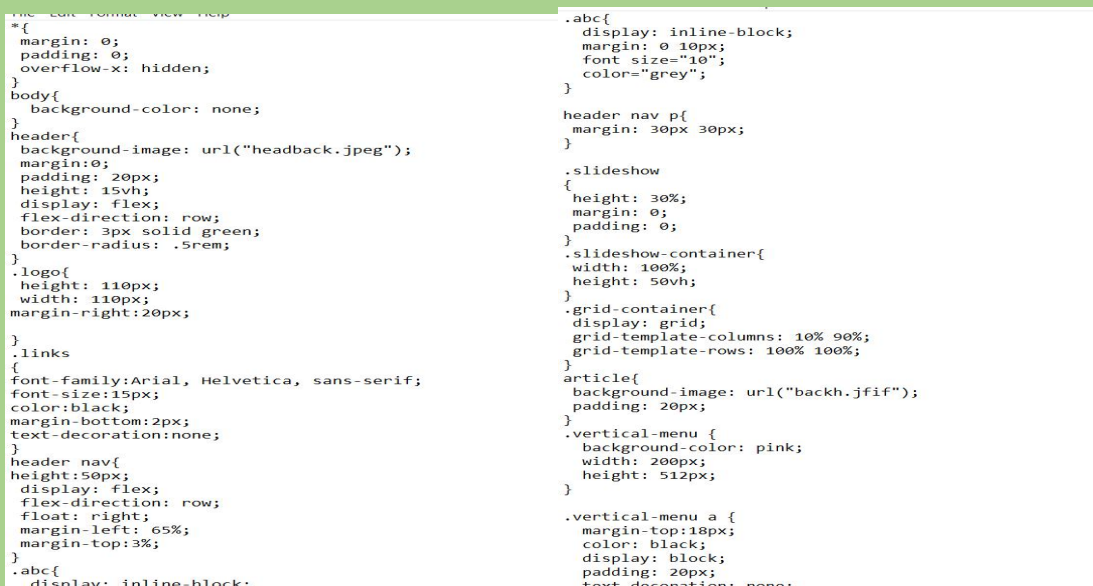

Html- html module is used to provide the contents of the web page and **various links** to the web page. All the text and links on the web page are obtained by using the html.

CSS-

The CSS module is used create different division/container classes that hold a particular contents of the web page providing them with suitable properties like height,width,colour,etc.

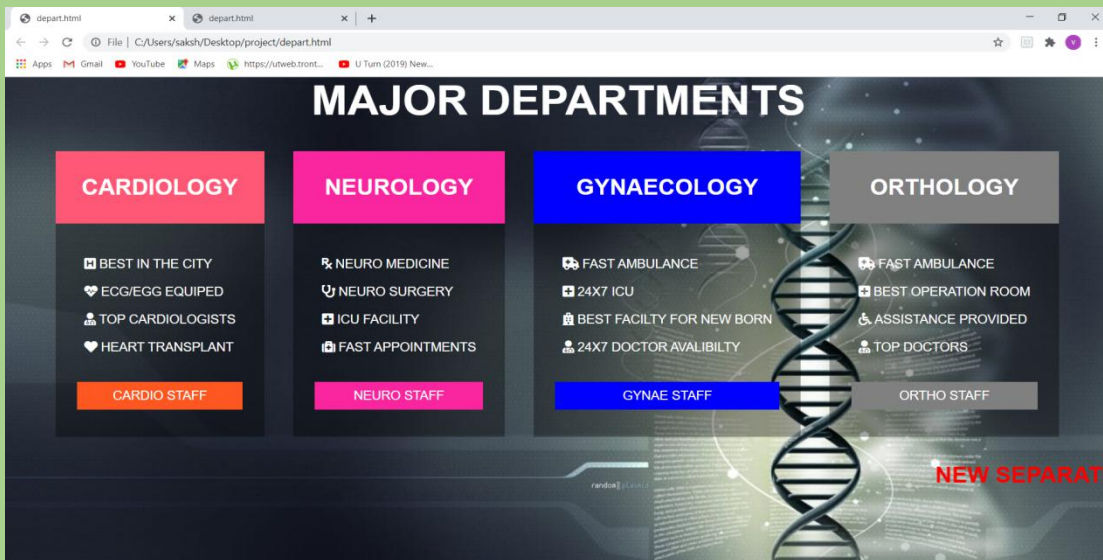

```
padding: 0;
}
.sideshow-container{
width: 100%;
height: 50vh;
}
.grid-container{
display: grid;
grid-template-columns: 10% 90%;
grid-template-rows: 100% 100%;
}
article{
background-image: url("backh.jfif");
padding: 20px;
}
.vertical-menu {
background-color: pink;
width: 200px;
height: 512px;
}
.vertical-menu a {
margin-top:18px;
color: black;
display: block;
padding: 20px;
text-decoration: none;
}
.vertical-menu a:hover {
background-color: #FF5470;
}
.vertical-menu a.active {
background-color: #4CAF50;
color: white;
}
h2{
color: #8D4E85;
font-face: Aerial;
}
```

JavaScript- The JavaScript module is used to create a slide show on the home page. The sub-module of the slide show is used in this web page

```
<script>
var slideIndex=0;
showslides();
function showslides()
{
var i;
var slides=document.getElementsByClassName("mySlides");
for(i=0;i<slides.length;i++)
{
slides[i].style.display="none";
}
slideIndex++;
if(slideIndex>slides.length)
{slideIndex=1;}
slides[slideIndex-1].style.display="block";
setTimeout(showslides, 3000);
}
</script>
```

Department page-

It is entirely created by using html and CSS modules

Html-

The html module is used to create the boxes and the contents inside them. **Marquee** tag is used to show the new addition of the COVID-19 Ward.

Font Awesome is also used to get attractive icons and symbols for the web page designing

```

Staff login page-

The modules used are html and CSS.

Module used-

Html-

The html is used to get the following fields for the staff login. **Forms using the Tables** is used as the sub-module to get the fields align. Textbox and drop-down menu is used to get the required fields.

```
1 <!DOCTYPE html>
2 <head>
3 <meta charset="utf=8">
4 <link rel="stylesheet" type="text/css" href="staff.css">
5 </head>
6 <body>
7 <div class="container">
8 <div class="heading">
9 <h1><font-family:"Copperplate">STAFF LOGIN</font></h1>
10 </div>
11 <article>
12 <form>
13 <table align="center" cellpadding="5px" cellspacing="5px">
14 <tr>
15 <td id="h">Staff ID</td>
16 <td><input type="text" id="stid"></td>
17 </tr>
18 <tr>
19 <td id="h">Password</td>
20 <td><input type="Password" id="pw"></td>
21 </tr>
22 <tr>
23 <td id="h">Department</td>
24 <td><select name="class" id="depart">
25 <option value="Cardiology">Cardiology</option>
26 <option value="Neurology">Neurology</option>
27 <option value="Orthology">Orthology</option>
28 <option value="GYNAECOLOGY">GYNAECOLOGY</option>
29 </select></td>
30 </tr>
31 <tr>
32 <td><button onclick="showData()">Login</button></td>
33 <td><input type="reset" value="reset"></td>
34 </tr>
35 </form>
36 </table>
37 </article>
38 </div>
39 </body>
40 </html>
41
```

CSS-

The CSS module provide the web page with background-image and the height,width,color of the various division classes in the web page created in the html code

```

New Patient Page-

The screenshot shows a web browser window with a single tab titled 'new.html'. The address bar shows the file path 'C:/Users/saksh/Desktop/project/new.html'. The page content features a 'NEW PATIENT REGISTRATION' form. The form is styled with red text for labels and has a white background. The background of the page is a blurred image of a medical professional in a blue uniform standing next to a patient lying on a gurney. The form fields are as follows:

- Patient's First Name**:
- Patient's Last Name**:
- Date of Birth**:
- Blood Group**:
- Gender**:
- Medical Problem**:

At the bottom of the form, there are two buttons: 'Submit' and 'reset'.

<td>ER DEPARTMENT</td>
<td>9473957489</td>
</tr>
</table>
</article>
</div>
</body>
</html>
```

CSS-

The CSS module is used to provide the page with the background image and the color,font,size of the text. Division classes width and height are provided by it.

A screenshot of a Notepad window titled "contact - Notepad". The window has a menu bar with "File", "Edit", "Format", "View", and "Help". The text area contains the following CSS code:

```
body {  
    background-image: url('contact.jpeg');  
    background-repeat: no-repeat;  
    background-size: cover;  
}  
  
.container {  
    width: 100%;  
}  
  
.heading {  
    text-align: center;  
    font-size: 30px;  
    color: #4B0082;  
}  
  
td{  
    text-align: center;  
    font-size: 25px;  
    color: red;  
}
```

First Aid (Single Page Application)-

Modules Used-

Html- It is used to design the home page of the **firstaid SPA**.

CSS modules are used to beautify the page and give specific background for the page.

Angular JS- Angular JS is used to develop the Single page app of the firstaid page. It is used to connect the different html pages to the home page of the SPA. Fire, Heart Attack and Fracture web pages are connected to the single page.

localhost/firstaid.html#/fire

[Fire burn](#) [Heart attack](#) [facture](#)

IN CASE OF FIRE

STEP 1- As quickly as possible soak the burn in cool water.

STEP 2- Cover the burn area lightly with clean dry cloth. Do not apply any butter/grease on it

STEP 3- Call medical services as soon as possible

localhost/firstaid.html#/heart

[Fire burn](#) [Heart attack](#) [facture](#)

IN CASE OF HEART ATTACK

STEP 1- Have some one quickly call the medical services.

STEP 2- Help the person lay down easily, and comfortably.

STEP 3- If person gets unconscious, start giving him/her CPR, there are 3 easy steps in CPR as C-A-B

CPR is as easy as C - A - B

Compressions: Push hard and fast. Airway: Tilt the victim's head. Breathe: Give mouth-to-mouth.

localhost/firstaid.html#/facture

[Fire burn](#) [Heart attack](#) [facture](#)

IN CASE OF FRACTURE

STEP 1- Help the person to a comfortable position and call the emergency services.

STEP 2- In case of Open Fracture stop the bleeding and cover it .

STEP 3- Start the PRICE treatment strategy which is a 5 feature first aid. It is the most effective technique.

PRICE - Treatment for soft tissue injuries and closed fractures

P: Protect the injury (stop further damage)
R: Rest
I: Ice -
C: Comfortable support
E: Elevate -
